1 Basic usage save+get

- Prove that
$$x^n + y^n = z^n$$
is not solvable in positive integers if n is at most -3.
- Refute the existence of black holes in less than 140 `characters`.
- Prove that factorization is easily done via probabilistic algorithms and advance evidence from knowledge of the names of its employees in the seventies that the NSA has known that for 40 years.

Refute the existence of black holes in less than 140 `characters`.

2 Play with verbatim

Some text here using `\begin{scontents}[print-env=true]`.
First code `\foo`
And more code `\bar`.
More text here using `\begin{scontents}[print-env=false]`.
More Text after `\end{scontents}`. Now using `\Scontents*`:
Now using `\typestored`:

```
First code \verb|\foo|

And more code \verb|\bar|.
```

Now using `\mergesc[typestored]`

```
First code \verb|\foo|

And more code \verb|\bar|.
    Second code \verb|\foo|

And more code \verb|\bar|.
code \verb|\baz|
```

Now using `\mergesc[meaningsc]`
`First code \verb|\foo|  And more code \verb|\bar|.  Second code \verb|\foo|  And more code \verb|\bar|. code \verb|\baz|`
Now using `\getstored[2]{contents}`
Second code `\foo`
And more code `\bar`.
