1 Objectives

The project has 2 objectives, developed in the methods: measure the effect of the method on small samples; compare the results with the ones of the previous studies.

The first one is the key of the project: measure the effect of the method on small samples.

2 Methods

2.1 First objective

measure the effect of the method on small samples

The samples are taken from the previous studies.

2.2 Second objective

compare the results with the ones of the previous studies
